Power BI – How and Why to Add Records Between the Start and End Date

February 2nd, 2022

By [Justin Song](#), Senior BI Analyst

If you have data that includes date ranges (such as tasks or projects with a start and end date) and create a visual in [Power BI](#) with either a start or end date, it will often give you incorrect results.

Let's have a look at an example below:

The first row shows 2 hours forecasted per day between January 3rd and January 7th. The data itself is correct, but is that what I want to see in my report as a project

Suggested Articles:

[How to Refresh Power BI Data in Dynamics 365 Finance & Operations](#)

manager? No, I want to see 2 hours for each day between January 3rd and January 7th, 10 hours (2 × 5 days) instead.

How can we do this in **Power BI** without altering the source of data?

Start Date	End Date	Forecast Hours per day
2022-01-03	2022-01-07	2.00
2022-01-10	2022-01-14	0.60
2022-01-10	2022-01-21	2.00
2022-01-17	2022-01-21	3.20
2022-01-24	2022-01-28	0.60
2022-01-24	2022-02-04	1.00
2022-02-14	2022-03-03	1.10
2022-03-07	2022-05-06	0.50
		11.00

What you need to do is transform your data. There are many methods you can use, but I'll show you one simple method to solve the problem.

Generating new records/rows between dates including start and end date:

- Click Transform data to open power query editor.

Operations

- Make sure the type of your dates is the “date” type.
- Click Add Column tab > Custom Column.

- Enter the name of column and expression below. {Number.From([Start Date])..Number.From([End Date])}
- Please note that the date is a number as well.
- Two dots will generate a list from Start Date and End Date.

in Dynamics 365 Finance &
Operations

- Click arrow button on newly created column Date and select “Expand to New Rows”.

Task ID	Project ID	Start Date	End Date	Forecast Hours	People ID	Date
232934716	6587139	2021-12-13	2021-12-15	8	17202805	

- You will find the same records/rows but different numbers of date from the list.

Task ID	Project ID	Start Date	End Date	Forecast Hours	People ID	Date
232934716	6587139	2021-12-13	2021-12-15	8	17202805	44543
232934716	6587139	2021-12-13	2021-12-15	8	17202805	44544
232934716	6587139	2021-12-13	2021-12-15	8	17202805	44545

- Change type to Date.

Task ID	Project ID	Start Date	End Date	Forecast Hours	People ID	Date
232934716	6587139	2021-12-13	2021-12-15	8	17202805	
232934716	6587139	2021-12-13	2021-12-15	8	17202805	
232934716	6587139	2021-12-13	2021-12-15	8	17202805	

Task ID	Project ID	Start Date	End Date	Forecast Hours	People ID	Date
232934716	6587139	2021-12-13	2021-12-15	8	17202805	2021-12-13
232934716	6587139	2021-12-13	2021-12-15	8	17202805	2021-12-14
232934716	6587139	2021-12-13	2021-12-15	8	17202805	2021-12-15

- Create a relationship to the date with your calendar dimension table in your model.
The result below is what I want to see in my report:
